Report 1 project description

Student Name: Abdelrahman Saifeldin----AHMED GAMAL AHMED ELAMIN

Roll Number: 202512587-202510422

Course Instructor: Eric Maniraguha

Submission Date: October 20, 2026

Project Description Report (report_1_project_description)

1. Business Idea

A modern coffee shop requires an automated information system to efficiently manage customer profiles, menu items, daily orders, and secure payment processing.

2. Problem Statement & Purpose

Traditional ordering methods in cafes often lead to delays, billing errors, and poor tracking of orders and menu updates. The proposed Coffee Shop Management System aims to automate order processing, streamline menu management, and track customer transactions accurately.

3. Project Scope

- Included: Managing customer details, browsing menu items, placing orders, calculating totals, and processing payments.

- Excluded: Employee payroll, inventory supply chain management, and physical store seating layouts.

4. Main Classes & Responsibilities

- Customer: Manages customer personal details and places orders.

- MenuItem: Stores items available for sale with descriptions, categories, and prices.
- Order: Handles order details, tracks status, and calculates total amounts.
- Payment: Processes payment transactions and payment methods.
